We provide individual software solutions for our customers in the area of production control systems and support of export activities. Our customers come from the Germany, Austria, Switzerland, Slovak and Czech Republic.

We are looking for a colleague in our development team who will be able to take care of administration of our own ERP system running at our German customer in machinery business with whom we cooperate successfully already more than 20 years.

The customer has production plants in 4 countries: Germany, Poland, U.S. and China.

**Project areas:**

- Administration of the production ERP systems of the customer
  - Regular updates of the main system on all location
  - Administration of MS SQL Server for the Datawarehouse, Industry 4.0 servers and others
- Development and administration of internal supporting systems at SPC solutions – update servers, build/test servers, ....
- Monitoring assigned systems and solving daily problems

**Required skills:**

- knowledge of MS SQL server
  - MS SQL DBA environment
  - Experience with writing and debugging of SQL queries and RDBMS MS SQL Server
  - SSIS, SSRS
- Experience in using script languages (PowerShell – Windows/Linux, bash)
- Networking and experience in ICT security
- Customer-centric approach
- Analytic and proactive thinking, thoroughness, systematicity, independence
- Endeavor of professional self-improvement
- Engagement, loyalty, reliability

**Advantage:**

Everything you already know, for example:

- Experience with RDBMS PROGRESS ([www.progress.com/openedge](http://www.progress.com/openedge))
- Hands-on experience with VMware virtualization (vSphere, vCenter)
- Experience in international development projects

**We offer:**

- Full-time job in the city of Zlín, Czech Republic
- Background of a stable family company, which is in the business more than 25 years
- Individual approach, loyalty
- Stable team, long-time perspective (some of our colleagues are more than 20 years with us)
- Possibility to extend professional know-how (we are working with .NET platform since its beginning in 1998)
- Business trips abroad, step-by-step introduction into a machinery control system modules and their integration into the main product.
- Top IT equipment (notebooks, phones, ...) even for personal use

- Flexible working hours, infinite sick-days policy
- Possibility to work from home after a period of ramp-up in Zlín (approx. 2-3years)
- Meal Vouchers in CZ, Language lessons in CZ (German or English language)
- Free coffee, tea and other beverages on the workplace
- Above-the-IT-average compensation based on results
